Key Word Index

A

Action syntax
behavioral sequence; grooming; ingestion stereotypy; computer-video analysis, 59

trigeminal somatosensation; deafferentation; grooming; ingestion; behavioral sequence; computer-video analysis, 69

Active avoidance
lanthanum; ouabain; anisomycin; γ-D-glutamylglycine; diphenylhydantoin; memory; mouse, 239

Activity
aggression; defeat; agonistic interaction; opioid; opioid-induced analgesia; feeding; stress; mouse, 77

Affective aggression
predatory aggression; noradrenaline; dopamine, 1

Aggression
defeat; agonistic interaction; opioid; opioid-induced analgesia; activity; feeding; stress; mouse, 77

Agonistic interaction
aggression; defeat; opioid; opioid-induced analgesia; activity; feeding; stress; mouse, 77

Amygdala
cross-modal recognition; polysensory cortex; monkey, 95

Analogue-to-digital conversion
animal communication signal; animal orientation signal; electric organ discharge; microprocessor; digital synthesis; digital-to-analogue conversion; signal waveform, 167

Animal communication signal
animal orientation signal; electric organ discharge; microprocessor; digital synthesis; analogue-to-digital conversion; digital-to-analogue conversion; signal waveform, 167

Animal orientation signal
animal communication signal; electric organ discharge; microprocessor; digital synthesis; analogue-to-digital conversion; digital-to-analogue conversion; signal waveform, 167

Anisomycin
active avoidance; lanthanum; ouabain; γ-D-glutamylglycine; diphenylhydantoin; memory; mouse, 239

Anxiolytic
tolerance; CL 218,872; tracazolate; tofisopam; exploration; locomotor activity; holeboard; mouse, 159

Appetitive learning
neurohypophysial hormone; arginine vasopressin; timing behavior; duration discrimination; temporal memory; divided attention; rat, 147

Arginine vasopressin
neurohypophysial hormone; appetitive learning; timing behavior; duration discrimination; temporal memory; divided attention; rat, 147

vasopressin; memory; avoidance behaviour; blood pressure; locomoter activity, 231

Avoidance behaviour
arginine vasopressin; vasopressin; memory; blood pressure; locomoter activity, 231

B

Bed nucleus of stria terminalis
medial preoptic area; lesion; sexual behavior; chemosensory function; male hamster, 181

Behavioral sequence
grooming; ingestion stereotypy; action syntax; computer-video analysis, 59

trigeminal somatosensation; deafferentation; grooming; ingestion; action syntax; computer-video analysis, 69

Biological channel
information theory; sensory-motor interaction; pointing movement, 23

Blood pressure
arginine vasopressin; vasopressin; memory; avoidance behaviour; locomotor activity, 231

Brain asymmetry
visual discrimination; learning; sex difference; testosterone; chicken, 261

C

Chemosensory function
medial preoptic area; bed nucleus of stria terminalis; lesion; sexual behavior; male hamster, 181

Chicken
brain asymmetry; visual discrimination; learning; sex difference; testosterone, 261

Cholinergic transmission
learning; memory; serotonergic transmission; rat, 43

CL 218,872
anxiolytic; tolerance; tracazolate; tofisopam; exploration; locomotor activity; holeboard; mouse, 159

Columbia obstruction box
mesolimbic system; nigrostriatal system; motivation; motor performance, 221

Computer-video analysis
behavioral sequence; grooming; ingestion stereotypy; action syntax, 59

trigeminal somatosensation; deafferentation; grooming; ingestion; action syntax; behavioral sequence, 69

Controllability
predictability; schedule-induced polydipsia; coping; food reinforcement; stress-induced analgesia; naloxone, 197

Coping
predictability; controllability; schedule-induced polydipsia; food reinforcement; stress-induced analgesia; naloxone, 197

Cortical connection
parietal cortex; spatial learning, 127

Cross-modal recognition
polysensory cortex; amygdala; monkey, 95

Current intensity function
stress; intracranial self-stimulation; nucleus accumbens; substantia nigra; mouse, 85

D

Deafferentation
trigeminal somatosensation; grooming; ingestion; action syntax; behavioral sequence; computer-video analysis, 69

Defeat
aggression; agonistic interaction; opioid; opioid-induced analgesia; activity; feeding; stress; mouse, 77

Digital-to-analogue conversion
animal communication signal; animal orientation signal; electric organ discharge; microprocessor; digital synthesis; analogue-to-digital conversion; signal waveform, 167

Digital synthesis
animal communication signal; animal orientation signal; electric organ discharge; microprocessor; analogue-to-digital conversion; digital-to-analogue conversion; signal waveform, 167

Diphenylhydantoin
active avoidance; lanthanum; ouabain; anisomycin; γ-D-glutamylglycine; memory; mouse, 239

Discrimination
orientation invariance; shape recognition; forebrain lesion; learning; pigeon, 251

Divided attention
neurohypophysial hormone; arginine vasopressin; appetitive learning; timing behavior; duration discrimination; temporal memory; rat, 147

Domestic chick
imprinting; learning; individual recognition; hyperstriatum ventrale; wulst, 269

Dopamine
affective aggression; predatory aggression; noradrenaline, 1

Duration discrimination
neurohypophysial hormone; arginine vasopressin; appetitive learning; timing behavior; temporal memory; divided attention; rat, 147

E

Electric organ discharge
animal communication signal; animal orientation signal; microprocessor; digital synthesis; analogue-to-digital conversion; digital-to-analogue conversion; signal waveform, 167

Exploration
anxiolytic; tolerance; CL 218,872; tracazolate; tofisopam; locomotor activity; holeboard; mouse, 159

F

Feeding
aggression; defeat; agonistic interaction; opioid; opioid-induced analgesia; activity; stress; mouse, 77

Food reinforcement
predictability; controllability; schedule-induced polydipsia; coping; stress-induced analgesia; naloxone, 197

Forebrain lesion
orientation invariance; shape recognition; discrimination; learning; pigeon, 251

G

Ganglioside
vestibular compensation; hemilabyrinthectomy; neuronal plasticity, 117

γ-D-Glutamylglycine
active avoidance; lanthanum; ouabain; anisomycin; diphenylhydantoin; memory; mouse, 239

Grooming
behavioral sequence; ingestion stereotypy; action syntax; computer-video analysis, 59

trigeminal somatosensation; deafferentation; ingestion; action syntax; behavioral sequence; computer-video analysis, 69

H

Hemilabyrinthectomy
vestibular compensation; ganglioside; neuronal plasticity, 117

Hippocampus
trace conditioning; nictitating membrane, 109

Holeboard
anxiolytic; tolerance; CL 218,872; tracazolate; tofisopam; exploration; locomotor activity; mouse, 159

Hyperstriatum ventrale
imprinting; learning; individual recognition; wulst; domestic chick, 269

I

Imprinting
learning; individual recognition; hyperstriatum ventrale; wulst; domestic chick, 269

Individual recognition
imprinting; learning; hyperstriatum ventrale; wulst; domestic chick, 269

Inferotemporal cortex
reversible cold lesion; visual behavior, 29

Information theory
biological channel; sensory-motor interaction; pointing movement, 23

Ingestion stereotypy
behavioral sequence; grooming; action syntax; computer-video analysis, 59

trigeminal somatosensation; deafferentation; grooming; action syntax; behavioral sequence; computer-video analysis, 69

Interocular transfer
visual wulst; supraoptic commissure; tectal commissure; posterior commissure, 175

Intracranial self-stimulation
stress; nucleus accumbens; current intensity function; substantia nigra; mouse, 85

L

Lanthanum
active avoidance; ouabain; anisomycin; γ-D-glutamylglycine; diphenylhydantoin; memory; mouse, 239

Learning
brain asymmetry; visual discrimination; sex difference; testosterone; chicken, 261

imprinting; individual recognition; hyperstriatum ventrale; wulst; domestic chick, 269

memory; serotonergic transmission; cholinergic transmission; rat, 43

Locomotor activity
anxiolytic; tolerance; CL 218,872; tracazolate; tofisopam; exploration; holeboard; mouse, 159

arginine vasopressin; vasopressin; memory; avoidance behaviour; blood pressure, 231

M

Male hamster
medial preoptic area; bed nucleus of stria terminalis; lesion; sexual behavior; chemosensory function, 181

Medial preoptic area
bed nucleus of stria terminalis; lesion; sexual behavior; chemosensory function; male hamster, 181

Memory
active avoidance; lanthanum; ouabain; anisomycin; γ-D-glutamylglycine; diphenylhydantoin; mouse, 239

arginine vasopressin; vasopressin; avoidance behaviour; blood pressure; locomotor activity, 231

learning; serotonergic transmission; cholinergic transmission; rat, 43

Mesencephalon
self-stimulation; refractory period; metencephalon; supernormal period, 205

Mesolimbic system
Columbia obstruction box; nigrostriatal system; motivation; motor performance, 221

Metencephalon
self-stimulation; refractory period; mesencephalon; supernormal period, 205

Microprocessor
animal communication signal; animal orientation signal; electric organ discharge; digital synthesis; analogue-to-digital conversion; digital-to-analogue conversion; signal waveform, 167

Monkey
cross-modal recognition; polysensory cortex; amygdala, 95

Motivation
Columbia obstruction box; mesolimbic system; nigrostriatal system; motor performance, 221

Motor performance
Columbia obstruction box; mesolimbic system; nigrostriatal system; motivation, 221

Mouse
active avoidance; lanthanum; ouabain; anisomycin; γ-D-glutamylglycine; diphenylhydantoin; memory, 239

aggression; defeat; agonistic interaction; opioid; opioid-induced analgesia; activity; feeding; stress, 77

anxiolytic; tolerance; CL 218,872; tracazolate; tofisopam; exploration; locomotor activity; holeboard, 159

stress; intracranial self-stimulation; nucleus accumbens; current intensity function; substantia nigra, 85

N

Naloxone
predictability; controllability; schedule-induced polydipsia; coping; food reinforcement; stress-induced analgesia, 197

Neurohypophysial hormone
arginine vasopressin; appetitive learning; timing behavior; duration discrimination; temporal memory; divided attention; rat, 147

Neuronal plasticity
vestibular compensation; ganglioside; hemilabyrinthectomy, 117

Nictitating membrane
hippocampus; trace conditioning, 109

Nigrostriatal system
Columbia obstruction box; mesolimbic system; motivation; motor performance, 221

Noradrenaline
affective aggression; predatory aggression; dopamine, 1

Nucleus accumbens
stress; intracranial self-stimulation; current intensity function; substantia nigra; mouse, 85

O

Opioid
aggression; defeat; agonistic interaction; opioid-induced analgesia; activity; feeding; stress; mouse, 77

Opioid-induced analgesia
aggression; defeat; agonistic interaction; opioid; activity; feeding; stress; mouse, 77

Orientation invariance
shape recognition; forebrain lesion; discrimination; learning; pigeon, 251

Ouabain
active avoidance; lanthanum; anisomycin; γ-D-glutamylglycine; diphenylhydantoin; memory; mouse, 239

P

Parietal cortex
spatial learning; cortical connection, 127

Pigeon
orientation invariance; shape recognition; forebrain lesion; learning; discrimination, 251

Pointing movement
information theory; biological channel; sensory-motor interaction, 23

Polysensory cortex
cross-modal recognition; amygdala; monkey, 95

Posterior commissure
interocular transfer; visual wulst; supraoptic commissure; tectal commissure, 175

Predatory aggression
affective aggression; noradrenaline; dopamine, 1

Predictability
controllability; schedule-induced polydipsia; coping; food reinforcement; stress-induced analgesia; naloxone, 197

R

Rat
learning; memory; serotonergic transmission; cholinergic transmission, 43

neurohypophysial hormone; arginine vasopressin; appetitive learning; timing behavior; duration discrimination; temporal memory; divided attention, 147

Refractory period
self-stimulation; metencephalon; mesencephalon; supernormal period, 205

Reversible cold lesion
inferotemporal cortex; visual behavior, 29

S

Schedule-induced polydipsia
predictability; controllability; coping; food reinforcement; stress-induced analgesia; naloxone, 197

Self-stimulation
refractory period; metencephalon; mesencephalon; supernormal period, 205

Sensory-motor interaction
information theory; biological channel; pointing movement, 23

Serotonergic transmission
learning; memory; cholinergic transmission; rat, 43

Sex difference
brain asymmetry; visual discrimination; learning; testosterone; chicken, 261

Sexual behavior
medial preoptic area; bed nucleus of stria terminalis; lesion; chemosensory function; male hamster, 181

Shape recognition
orientation invariance; forebrain lesion; discrimination; learning; pigeon, 251

Signal waveform
animal communication signal; animal orientation signal; electric organ discharge; microprocessor; digital synthesis; analogue-to-digital conversion; digital-to-analogue conversion, 167

Spatial learning
parietal cortex; cortical connection, 127

Stress
aggression; defeat; agonistic interaction; opioid; opioid-induced analgesia; activity; feeding; mouse, 77

intracranial self-stimulation; nucleus accumbens; current intensity function; substantia nigra; mouse, 85

Stress-induced analgesia
predictability; controllability; schedule-induced polydipsia; coping; food reinforcement; naloxone, 197

Substantia nigra
stress; intracranial self-stimulation; nucleus accumbens; current intensity function; mouse, 85

Supernormal period
self-stimulation; refractory period; metencephalon; mesencephalon, 205

Supraoptic commissure
interocular transfer; visual wulst; tectal commissure; posterior commissure, 175

T

Tectal commissure
interocular transfer; visual wulst; supraoptic commissure; posterior commissure, 175

Temporal memory
neurohypophysial hormone; arginine vasopressin; appetitive learning; timing behavior; duration discrimination; divided attention; rat, 147

Testosterone
brain asymmetry; visual discrimination; learning; sex discrimination; chicken, 261

Timing behavior
neurohypophysial hormone; arginine vasopressin; appetitive behavior; duration discrimination; temporal memory; divided attention; rat, 147

Tofisopam
anxiolytic; tolerance; CL 218,872; tracazolate; exploration; locomotor activity; holeboard; mouse, 159

Tolerance
anxiolytic; CL 218,872; tracazolate; tofisopam; exploration; locomotor activity; holeboard; mouse, 159

Tracazolate
anxiolytic; tolerance; CL 218,872; tofisopam; exploration; locomotor activity; holeboard; mouse, 159

Trace conditioning
hippocampus; nictitating membrane, 109

Trigeminal somatosensation
deafferentation; grooming; ingestion; action syntax; behavioral sequence; computer-video analysis, 69

V

Vasopressin
arginine vasopressin; memory; avoidance behaviour; blood pressure; locomotor activity, 231

Vestibular compensation
ganglioside; hemilabyrinthectomy; neuronal plasticity, 117

Visual behavior
inferotemporal cortex; reversible cold lesion, 29

Visual discrimination
brain asymmetry; learning; sex difference; testosterone; chicken, 261

Visual wulst
interocular transfer; supraoptic commissure; tectal commissure; posterior commissure, 175

W

Wulst
imprinting; learning; individual recognition; hyperstriatum ventrale; domestic chick, 269
